HARMS PLAINVIEW RANCH

CUSTOMER CONVENIENCE BULL SALE

————— 2025 —————

CONSISTENT • RELIABLE • PROGRESSIVE

CUSTOMER DRIVEN . . . INDUSTRY FOCUSED

ANGUS • CHAROLAIS • RED ANGUS

WELCOME

Our family extends this invitation to experience seedstock selection you simply won't find anywhere else. For 31 years the success of our customers has guided our breeding decisions with relevance to literally every aspect of real-world beef production. Progress requires dedication to developing relationships built on mutual trust and respect... our marketing format continues to deliver on those fundamentals. It is understandable to have particular needs, we'll take the time necessary to listen and help find the right bull or bulls on course for the direction of your operation. Our hope is you will always find HPR a comfortable place to call... *home*

RESPECTFULLY

Mark & Kim Harms

our approach

HARMS PLAINVIEW RANCH 2025 CUSTOMER CONVENIENCE BULL SALE

SIMPLE CONVENIENT *tailored to you*

For 31 years we have perfected the “simple” approach to bull buying. We believe in a low pressure, pleasurable and informative process with our customer needs at the forefront. Join us 6 days a week for personal service to confidently select according to your needs.

SALE FORMAT

We sell seedstock your way!

All cattle will be priced and sold on a first come first serve basis off of the ranch at your convenience. Viewing is available 6 days a week with Sunday reserved for our family time.

SALE LOCATION

All cattle are available at Harms Plainview Ranch. Please contact Mark or Kim to set up a time convenient for you to view the offering. You can also view videos and sale information on our web site at

www.HARMSRANCH.com.

SELLING 183 AGE ADVANTAGED BULLS

114 – 18 MONTH OLD REGISTERED ANGUS BULLS

20 – 18 MONTH OLD REGISTERED CHAROLAIS BULLS

27 – 18 MONTH OLD REGISTERED 100% 1A RED ANGUS BULLS

17 - 2 YEAR OLD REGISTERED ANGUS BULLS

5 - 2 YEAR OLD REGISTERED CHAROLAIS BULLS

SIGHT UNSEEN PURCHASES

As seedstock providers we are always working to find new ways to offer meaningful services to current and potential customers. Our sight unseen program continues to grow simply because it works. It's much more than simply filling an order based on price — you'll receive in-depth analysis from our entire offering and selection that truly addresses your particular needs for profitability. If this service could benefit you given your busy schedule — all you have to do is ask. We stand behind each sight unseen purchase 100% and pride ourselves in customer satisfaction.

HERD HEALTH PROTOCOL

At time of synchronization, calves are vaccinated with Nasalgen IP, Vision 7 Somnus, Vista Once SQ and treated with Dectomax dewormer. At weaning, calves are dewormed with Safe-Guard and re-vaccinated with Vision 7 Somnus, Vista 5 SQ and Endovac-Bovi. In February all breeding stock receives external parasite control and Bovishield Gold FP5-VL5. All animals are tested and guaranteed negative for PI-BVD.

DNA TESTED

All sale animals have been DNA tested to enhance EPD accuracy, verify parentage and test for known genetic defects.

READY TO WORK

Bulls have EID 840 Tags, Ear Tags with their ID number, Sire and Dam. They are also Freezebranded with their ID. Every bull has passed a breeding soundness exam performed by Dr. Rebecca Erwin, of the Animal Health Center of Marion County, Marion, Kansas. From birth, these bulls have been handled with you in mind. They have been exposed to human interaction frequently with horses, ATV's and on foot. We work hard to make sure your bulls have a positive experience every time we interact with them.

SALE VIDEOS

All sale bulls will be videoed. You may see those videos online on our web site at www.HARMSRANCH.com

PERCENTILE RANKS – (% values listed directly under each epd/index) Percentile ranks indicate where this animal’s EPDs rank vs. other non-parent animals in the AAA database. A 10% rank indicates that animal is in the top ten percent of the over half a million non-parent animals in the AAA database.

CALVING EASE DIRECT (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire’s calves will be born when he is bred to first-calf heifers.

BIRTH WEIGHT EPD (BW), expressed in pounds, is a predictor of a sire’s ability to transmit birth weight to his progeny compared to that of other sires.

WEANING WEIGHT EPD (WW), expressed in pounds, is a predictor of a sire’s ability to transmit weaning growth to his progeny compared to that of other sires.

YEARLING WEIGHT EPD (YW), expressed in pounds, is a predictor of a sire’s ability to transmit yearling growth to his progeny compared to that of other sires.

MATERNAL MILK EPD (MILK), is a predictor of a sire’s genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf’s weaning weight attributed to milk and mothering ability.

HEIFER PREGNANCY (HP), is a selection tool to increase the probability or chance of a sire’s daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

SCROTAL CIRCUMFERENCE EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

DOCILITY (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire’s calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

MARBLING EPD (MARB), expressed as a fraction of the difference in USDA marbling score of a sire’s progeny compared to progeny of other sires.

RIBEYE AREA EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire’s progeny compared to progeny of other sires.

MATERNAL WEANED CALF VALUE (SM), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

COMBINED SVALUE COMBINED VALUE (SC), expressed in dollars per head, is an index which includes all traits that make up both Maternal Weaned Calf Value (SM) and Beef Value (SB) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat)

CLAW SET EPD (CLAW), is expressed in units of claw-set score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal claw set. The ideal claw set is toes that are symmetrical, even and appropriately spaced.

FOOT ANGLE EPD (ANGLE), is expressed in units of foot-angle score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

The presence of a genomic symbol indicates genomic data obtained through DNA testing have been incorporated into the above EPDs to ensure the highest possible accuracy for non-parent bulls.

Program Designation with either of these symbols means calves sired by this bull are eligible for this value added program. Top Dollar Angus and/or On Target for Certified Angus Beef (CAB).

LIGHTNING

I saw lightning in the sunset
 Blazed a trail across the prairie
 Made memories hard to forget
 Let the rain drops set me free
 Felt the cool autumn breeze
 Talked to the Lord in a morning meeting
 Prayed that time could just freeze
 Oh why must this life be so fleeting

Plainsman Poetry by Payton Harms

A COWBOY'S FINAL PRAYER

Bury me beneath the bluestem
While a lonesome fiddle plays.
Speak not much on living or dying
Or my old cowboy ways.

Just let the prairie symphony play.
Let the stillness soothe the sadness.
May comfort be found in the peace
Amidst the tears a moment of gladness.

Lord, I do not ask for much,
But in my final hour
Lead me out to the hills
Reclaim my soul with Your holy power.

In the distance I will hear
A lonesome fiddle play
And on the cool prairie breeze
The bluestem will gently sway.

Plainsman Poetry by Payton Harms

PERCENTILE RANKS (% values listed directly under each epd/index) Percentile ranks indicate where this animal's EPDs rank vs. other non-parent animals in the AICA database. A 10% rank indicates that animal is in the top ten percent of all non-parent animals in the AICA database.

CALVING EASE DIRECT (CE) is expressed as a difference in percentage of unassisted births in first calf heifers. A higher value indicates greater calving ease. It predicts the average difference in unassisted births with which a sire's calves will be born when bred to first-calf heifers

BIRTH WEIGHT EPD (BW) The expected difference in average birth weight (pounds) of progeny. Birth weight reflects prenatal growth.

WEANING WEIGHT EPD (WW) The expected difference in average weaning weight of calves. The evaluation reflects the genetic influence on pre-weaning growth rate.

YEARLING WEIGHT EPD (YW) The expected difference in average yearling weight of progeny. The evaluation reflects genetic influence on both pre-weaning and post-weaning growth rate.

MATERNAL MILK EPD (MILK) The genetic ability of a sire's or dam's daughters to express in pounds of weaning weight in her calves due to her maternal ability through mothering instinct and milk.

CALVING EASE MATERNAL (MCE) is expressed as a difference in percentage of unassisted births in first calf daughters. A higher value indicates greater calving ease. It predicts the average difference in unassisted births with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

SCROTAL CIRCUMFERENCE EPD (SC) The expected difference in scrotal circumference (expressed in centimeters) of a bull's or dam's male offspring at yearling compared to progeny of all other animals evaluated. Research has also indicated a relationship between increased SC EPD and decreased age at puberty for daughters.

CARCASS WEIGHT EPD (CW) Expected progeny differences for Carcass Weight is a predictor of pounds of retail product at a constant age endpoint. Selection for increased values should result in heavier carcasses, while selection for decreased values should result in lighter carcass weights at the same age endpoint. Carcass Weight EPD are expressed in pounds and is a predictor of the differences in hot carcass weight between parents progeny at an age constant endpoint.

Ribeye Area EPD (REA) Ribeye area is measured from a cross-sectional area of the longissimus dorsi muscle at the 12th rib. Ribeye area is a major component of the USDA yield grade equation and selection for increased ribeye area should result in larger ribeyes and lower yield grades between animals with the same carcass weight. Ribeye area has a positive relationship with weight, the larger the animal the larger the ribeye area. Ribeye Area EPD are expressed in square inches and is a predictor of differences in ribeye area between parents progeny at a constant age endpoint.

RIBEYE AREA EPD (REA) Ribeye area is measured from a cross-sectional area of the longissimus dorsi muscle at the 12th rib. Ribeye area is a major component of the USDA yield grade equation and selection for increased ribeye area should result in larger ribeyes and lower yield grades between animals with the same carcass weight. Ribeye area has a positive relationship with weight, the larger the animal the larger the ribeye area. Ribeye Area EPD are expressed in square inches and is a predictor of differences in ribeye area between parents progeny at a constant age endpoint.

FAT THICKNESS EPD (FAT) Fat thickness is measured at the 12th rib and is the primary component to the USDA Yield Grade equation. Fat thickness has a negative relationship to cutability; therefore, selection base on decreased fat thickness should result in lower yield grades and leaner cattle given the same age endpoint. Fat Thickness EPD are expressed in inches and are a predictor of differences in fat thickness between parent's progeny at an age constant endpoint.

MARBLING SCORE (MARB) Marbling is a subjective measure of the amount of intramuscular fat in the ribeye muscle. Marbling score is the primary component of USDA Quality grade and selection for increased Marbling Score EPD should result in cattle with higher quality grades at the same age endpoints. Marbling score has a small genetic correlation with fat, therefore producers may select for increased marbling score EPD while not changing external fat thickness when cattle are harvested at the same age-constant endpoint. Marbling EPD is a prediction of the differences in the USDA subjective marbling score between parent's progeny at an age constant endpoint.

TERMINAL SIRE INDEX (TSI) The AICA Terminal Sire Index (TSI) is a formal method of combining Expected Progeny Differences (EPD) — BWT, WWT, YWT, REA, HCW, MARB and FAT — into one single value on which to base selection decisions. The TSI uses estimates of the genetic relationships between traits with an economic default value based on three year rolling USDA data. The TSI represents a dollar index per terminal progeny produced for a bull in the AICA database, ranking them for profit potential. This dollar index is to be interpreted much like single trait EPD. For example, if Sire A's index is \$191.66 and Sire B's index is \$200.00, then we would expect Sire B's offspring to average \$8.34 more net return (\$200.00 minus \$191.66) than Sire A's offspring.

The presence of a genomic symbol indicates genomic data obtained through DNA testing have been incorporated into the above EPDs to ensure the highest possible accuracy for non-parent bulls.

PERCENTILE RANKS - (% values listed directly under each epd/index) Percentile ranks indicate where this animal's EPDs rank vs. other non-parent animals in the RAAA database. A 10% rank indicates that animal is in the top ten percent of the approximate 150,000 non-parent animals in the RAAA database.

PROFITABILITY AND SUSTAINABILITY (ProS) - An all-purpose index that is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. The resulting index is expressed in dollars per head born.

HERDBUILDER (HB) - RAAA HerdBuilder is an index which compares relative profitability per cow exposed when bulls are used on heifers and cows, replacements are kept and all steers and cull heifers are fed and marketed on a value based grid

GRIDMASTER (GM) - RAAA GridMaster index compares relative profitability per cow exposed when bulls are used on mature cows but no replacements are kept, and all progeny are fed and marketed on a value based grid.

CALVING EASE DIRECT (CED) - predicts the probability of calves being born unassisted out of 2-year-old heifers. Producers want live calves - born unassisted. Selecting on actual birth weight is flawed; it is influenced by non-genetic factors such as nutrition and weather (ambient temperature). While BW EPD removes these non-genetic factors, Red Angus' CED EPD is the best predictor of calving ease. The CED EPD includes variation in BW plus other influential genetic factors such as gestation length, calf shape, etc.

BIRTH WEIGHT EPD (BW) - predicts the difference, in pounds, for birth weight, and is also used in the calculation of Red Angus' Calving Ease Direct (CED) EPD.

WEANING WEIGHT EPD (WW) - predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

YEARLING WEIGHT EPD (YW) - predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

MILK EPD (MILK) - predicts the difference in maternal production of an individual animal's daughters as expressed by the weaning weight of their calves.

MAINTENANCE ENERGY (ME) - predicts differences in daughters' maintenance energy requirements and is expressed in Mcal/Month. Recognizing that 70% of cowherd feed costs are burned up in maintaining weight and condition, Red Angus' ME EPD allows for the selection of bulls whose daughters will require less feed; thus, reducing cowherd expenses. Include selection pressure for ME EPD to ensure feed costs don't get out of line when selection is made for greater performance and production.

HEIFER PREGNANCY (HPG) - predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding

STAYABILITY (STAY) - predicts the probability of a bull's daughters remaining productive until at least six years of age. Why six? That's how long it takes a female to breakeven given all the expenses of development.

MARBLING SCORE (MARB) - predicts differences for carcass marbling score as expressed in marbling score units. Higher marbling scores are positively correlated with higher carcass quality grades.

RIB EYE AREA (REA) - predicts differences of carcass Rib Eye Area between the 12th and 13th rib. Increased Rib Eye Area has a beneficial effect on Yield Grade which also includes Carcass Weight and Fat Thickness.

The presence of a genomic symbol indicates genomic data obtained through DNA testing have been incorporated into the above EPDs to ensure the highest possible accuracy for non-parent bulls.

Program Designation with this symbol mean calves out of this bull are eligible for this value added program Top Dollar Angus.

HPR PHH 100 PROOF 6500 –“PROOF” IS A SPECIAL COW IN PAYTN’S HERD. SHE WAS THE CHAMPION RED ANGUS HEIFER AT THE KANSAS STATE FAIR AND THE KANSAS JUNIOR LIVESTOCK SHOW. AS A 2 YEAR OLD SHE PRODUCED AND RAISED TWIN HEIFER CALVES THAT MADE THE REPLACEMENT PEN AND THEN TURNED AROUND AND PUT THREE TOP SELLING BULLS IN OUR BULL PEN. SHE IS PICTURED WITH HER HEIFER CALF THAT SHE GAVE PAYTON FOR HIS KEEPER PEN. I CAN’T WAIT TO SHOW YOU A FUTURE PICTURE OF THIS HEIFER STANDING OUT IN THE CALVING PASTURE WITH HER CALF AT SIDE.

celebrating thirty one years

IN THE SEEDSTOCK BUSINESS

Dr. Don Good with Mark in 1993.

Selecting our foundation Angus cows from the Dr. Don Good Herd

Kim with Sweet 16

Selecting our foundation Red Angus cows from Emery Pierson in Clarville, NY on the banks of the Nevershink River

Our daughter, Taylor, was born in June 1994. She was about 1 year old here.

Thank you to our parents for their constant support. Taylor with Kim's mom, Peggy, in 1998.

The first Charolais bull calf born at HPR in 2000.

We welcomed our son, Cade, in July 1998. He's about 2 years old here.

Alta Genetics Australian Beef Tour at HPR in 2001.

Our youngest son, Payton, was born in April 2000. 17 months old and ready to help!

Mark, Payton and Brandon West moving cows. Brandon became a part of our family!

Payton on Fury...a mare so special to our family.

Taylor with her first show heifer, Sugarbaby...a Calculator daughter.

Taylor and Lil' Red, Champion Red Angus Heifer at KSF 2006 and 2007, as well as Champion Red Angus Heifer at KJLS 2006.

Cade with his show heifer, Tootsie. She got it done inside and outside the ring - later becoming an American Angus Pathfinder Dam.

The one time all three Harms kids were in the same class! Tri-County Fair 2010.

Mark speaking to KLA Young Stockman's Academy in 2010.

Family picture with the export heifers bound for Russia in 2012.

KLA Convention 2012...supporting Mark as he became KLA President.

Taylor with Sugarbaby. Sugarbaby was 14 years old and still getting it done in our herd...she was an American Angus Pathfinder Dam, as well as earned her spot as a Donor Cow at HPR.

Payton and Proof, Champion Red Angus Heifer at KJLS 2017, as well as KSF 2017 and 2018. She gave him a beautiful replacement heifer this year.

family
